

Glen Coleman, CTO

Glen Coleman is an Indoor Environmental Specialist and Mold Inspection Certified Professional. He is certified by the International Indoor Air Quality Commission. Glen is Chief Technical Officer for Healthy Technologies, Inc., and uses his technical knowledge and broad experience to investigate indoor environmental and mold problems for the benefit of residential, commercial and industrial clients. Glen's vast technical background enables him to relate building systems to the problems discovered in the course of mold inspections and indoor environmental evaluations. His inherently technical nature assures that Glen will recommend intelligent, affordable solutions to every client for their unique problems.

Glen was formerly certified as an Industrial Maintenance Technician First Class, Class A Maintenance Mechanic and Master Manufactured Housing Technician.

Glen also served with the US Army for nine years in Air Defense Operations and Intelligence, posted in the US, Germany and Greece.
